# The Heavy-Duty Printer with Maximum Flexibility & Productivity

The AS-Orbit Base is a superior, heavy-duty production address printer that is as unique as it is versatile. Perfect for higher volume mail centers, the AS-Orbit Base works as either a standalone address printing solution, or in line with other mail processing equipment such as a folder inserter or mailing system.

Whether you're designing a new production mail environment or expanding your existing mailing operation, the AS-Orbit Base integrates seamlessly with your existing equipment.

Not only is it the only address printer in its price range to offer up to 152 mm of printing area, it is also print configurable, allowing users to add up to 12 print heads. This fixed head printer has variable print head positioning, which allows you to place addresses, graphics, teaser messages or even a postal permit anywhere on the mailpiece. And the more personalized the mailpiece, the greater the chance it will be opened and responded to.

Accommodating nearly any size document, the AS-Orbit Base utilizes a vacuum base system to reduce the chance of misfeeds while providing up to a 600 dpi address, postal barcode, text and graphics for a professional mailpiece every time. It will easily meet your needs for ultimate flexibility and tight deadlines, and is the ideal system for universities, quick printers, membership organizations, direct mail services and so much more.

## Quick Facts

- Up to 39,000 addresses per hour
- Up to 12 print heads with up to an adjustable 152 mm print area
- Spot color printing for versatile messaging
- Envelope design software for personalized mailings
